## INSULATOR, BULB PLANTS CITE SUCCESS; DEVELOP NEW TV SETS

BUILDS 400-KILOVOLT BUSHING - Vechernyaya Moskva, 14 Jul 50

On the night shift at the Moscow Insulator Plant, the supply shop is able to produce all the porcelain items needed for the next day's operations, as well as a large quantity which goes into storage as a reserve for the winter period. The shop is currently being enlarged and new equipment added.

In the porcelain-molding shop, workers have pledged to increase by  $l^{\frac{1}{2}}$  times the output of insulators for high-tension transformers.

Today the porcelain case for a new bushing was completed. This bushing, the first of its kind to be built, can carry up to 400 kilovolts.

STEPS UP VACUUM TUBE OUTPUT -- Vechernyaya Moskva, 12 Jul 50

All sections of the Moscow Electric Bulb Plant have gone on the peace watch. Workers in the receiver-amplifier tube section have pledged to get out 300 tubes over plan every day.

A worker, shop or plant is said to be operating on the "peace watch" when the Stockholm Petition has been circulated and signed in an industrial enterprise. Special individual pledges for increase production are made on this occasion, and the excess product is designated as "production for peace." Since every adult in the USSR has signed the petition, the entire country is now on the peace watch. Note: Soviet industry is always on some watch or another. Examples: Stalin's birthday watch, election day watch, convocation of the Supreme Soviet watch, May Day watch, anniversary of the October Revolution watch, New Year's watch, etc./

Vechernyaya Moskva, 14 Jul 50

NAVY AIR

STATE

ARMY

The radio tube shop frequently puts out 400-450 vacuum tubes over plan per day, in contrast to its pledge of 300 tubes.

BULB PLANT TO GET NEW CONVEYERS -- Leningradskeya Pravda, 26 Jul 50

The L'vov Low-Voltage Electric Bulb Plant has completed its 10-month plan. Target date for completion of the year plan is 17 September. Two new conveyer lines are currently being installed. Apparently there are two electric bulb plants in L'vov

50X1-HUM

DEVELOPS NEW TV SETS -- Znaniye-Sila, No 6, Jun 50

The Leningrai Plant imeni Kozitskiy has produced the first experimental models of a new television set, designated the T-2. The viewing screen is  $13 \times 18$  centimeters. Simultaneously the plant has brought out the model T-3 TV set, the screen of which is  $18 \times 24$  centimeters. The T-3, which resembles a console radio, has a regular radio receiver and phonograph built into the cabinet.

The plant laboratory is currently working on a Model T-4, which employs a special type of projection tube. The image in the T-4 will be projected on a wall screen the size of an open newspaper page.

CALLS FOR 1951 ELECTRICAL ORDERS -- Sovetskaya Latviya, 26 Jul 50

The Latvian Office of Clavelektosbyt (Main Administration for Sale of Products of the Ministry of Electrical Industry USSR), located in Riga, is now accepting orders for 1951 requirements. Orders for capital equipment and cable in the planned-procurement category, and orders for cable, installation parts, and lighting apparatus in the decentralized-planning category can be accepted.

Orders can be accepted only from main administrations of supply or department of republic or Union-republic ministries, or from enterprises of all-Union subordination.

Orders for capital equipment and cable must be received by 1 August, and orders for installation parts by 10 August 1950. All questions concerning orders should be directed to the Office of Glavelektrosbyt, Riga.

REPAIR PLANT PRODUCTS -- Vechernyaya Moskva, 14 Jul 50

The Moscow Electrical Repair Plant of the Moscow Power-Equipment Repair Trust manufactures electric motors, generators, and special electrical instruments.

MAKES NEW MOTORS -- Sovetskaya Litva, 26 Jul 50

New products of the Vel'nyus El'fa Electrical-Machine Building Plant include the "Litva" electric motor, and motors for refrigerators and phonographs.
